

Beautiful Lady's Gloves!

Made from the finest baby skin money can buy!
Keep your lovely hands warm this season with
these genuine 1-year-old flesh gloves.

It's Our Only Solution!

It's the ONLY way to save our
country!

What else are we going to do?

- Child support (no way!)
- No fancy stuff (what? I can't live without my fancy stuff!)
- Encourage women to be harder workers (they wouldn't even try)
- Spend your money in a smarter way (It's my money to spend how I want!)
- Show love to each other and our country (gross!)
- Stop cheating each other and show compassion (be honest? nope!)

Obviously none of these
suggestions will work because
no one would ever seriously try
it!

Handsome Gentleman's Boots!

Sturdy men's summer boots
made with authentic baby skin!

A Modest Proposal

BY: Jonathan Swift

Abbreviated

Are you tired of seeing beggars and homeless on our streets? Does it anger you when they have 3, 4, or 6 children all trailing along behind them?

We all know these children won't grow up to be any better, they will just become thieves or worse!

We can agree that these children, who take up all their parents time, money, and food, are a big problem. Who ever solves this problem should get a statue and be called a hero!

Worry no more, I have a plan that will take care of those burdensome children and help all parents who cannot afford their kids!

I have considered all the other plans but they won't work in our land, times are tough already!

How Can We Help?

The plan: When babies turn one year old we simply collect them, butcher them, pay the mother \$8, and sell them to rich people!

According to Americans: BABIES TASTE DELICIOUS!

Fact: Babies don't need any extra food for the first year because they can be breastfed.

Fact: Children cost their parents food and clothing.

Fact: Children can actually GIVE their parents food and clothing!

(AND EVEN GIVE FOOD AND CLOTHING TO THOUSANDS!)

Great news! My plan will lower abortions and newborn murder!

Important figures:

1.5 million people in our country

200,000 breeding couples

30,000 couples who can actually care for their kids

50,000 lost in accidents or sickness

120,000 available children for my plan

Benefits:

1. Fewer Catholic (yuck!)
2. Poor people can pay their debts with their babies!
3. The whole nation benefits from the \$\$\$
4. Pregnant women get \$\$ instead of burdensome kid
5. More restaurants will get business (Deep fried baby leg? YUM!)
6. Competition among wives for who can make the biggest baby

Don't believe me? Go ask one of the beggars and they'll tell you they would much rather have been eaten at 1 year old than spend the rest of their lives living out in the weather, in debt to landlords, and raising children that they know will have a life as bad as theirs or worse.
